Reverse Zodiac

- **"The signs of the Chinese zodiac have the strange peculiarity of proceeding in a retrograde direction, that is against the course of the sun." *Bellamy, Moons, Myths and Man.***

The Sun is in the East in Spring only in a Reverse Orbit

The sun is South in Leo 12PM Summer 2356 BC. The sun was East in Scorpius in Spring. The sun is in the East in Spring.

Spring in the East

- "But the vernal mansions go to the west and the autumnal ones to the east, reversing the previous directions of these two seasons, and in opposition to the prevailing notion of the Chinese that the spring belongs to the east." *Chinese Classics, III, p.94* Only in a reverse orbit can the sun be in the east in spring.

- *Politicus, Plato, 431 - 351 BC*

"Str. No, not that; but another part of the story, which tells how the sun and the stars once rose in the west, and set in the east, and that the god reversed their motion, and gave them that which they now have as a testimony to the right of Atreus..."

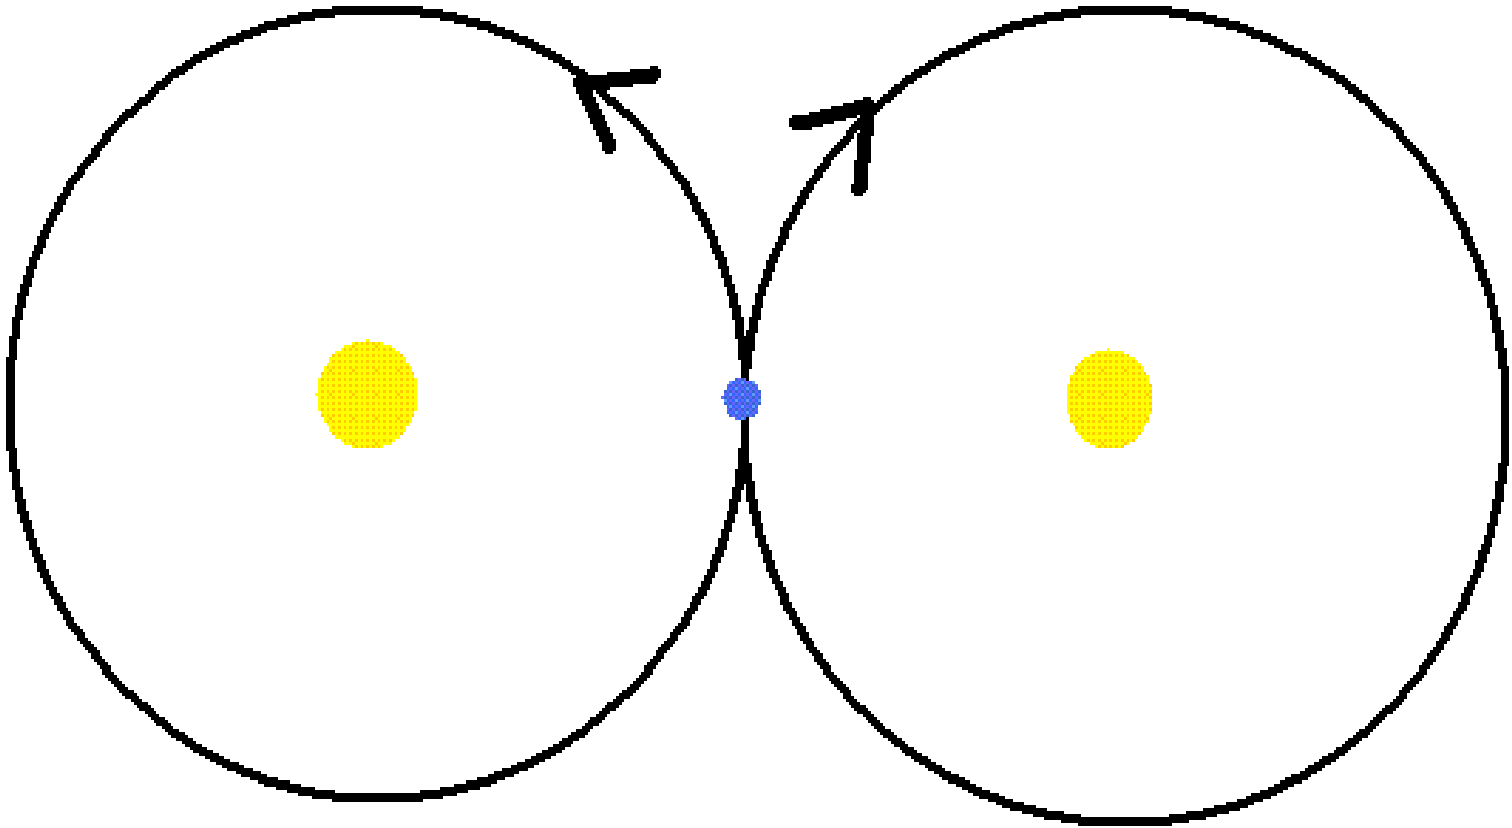

Reverse Orbit

- Str. Listen, then. There is a time when God himself guides and helps to roll the world in its course; and there is a time, on the completion of a certain cycle, when he lets go, and the world being a living creature, and having originally received intelligence from its author and creator turns about and by an inherent necessity revolves in the opposite direction.

Normal Zodiac

Reverse Zodiac

The first letter of each zodiacal sign is used. The zodiac represents the sign the sun is in. Thus from the blue earth in spring, in March, the sun is in Aquarius.

Likewise, when the sun moves to the other side of earth, the sun is in Leo.

Ch'u Silk Manuscript

- The [movements of the] Sun and the Moon (= verb?) in confusion, the Stars and the Constellations will not be in harmony. Should [the movements of] the Sun and the Moon have already become confused, then by the close of the year (= verb?), the seasonal rainfall will come and go, and there will be no regularity. Respectful (= humble?) people not yet aware [of this], will regard [it] as thence (= as a norm). Do not move (= disturb?) the multitudes of the people

The Norm?

- Reverse orbits did not seem very unusual to ancient people.
- The path of the zodiac was exactly the same in reverse.
- Intelligent astronomers knew something very unusual was going on.
- They, like scientists today, were told to tell the people this is nothing but normal.
